

AEROBIC WASTEWATER TREATMENT SYSTEM

Benefits

- No drain field required
- Produce a high quality effluent (discharge)
- Suitable for use in nearly any soil condition
- One-piece construction
- Low cost installation
- User friendly
- Easy access to every component
- Heavy duty reinforced concrete (no plastic inserts)
- No moving parts to wear out including control box that uses simple mechanical timers
- No filters to change or clog up
- Low cost maintenance
- Can be used to correct many failing systems
